

SRA DEVELOPMENT BOARD

SOCIETY OF ROBOTICS AND AUTOMATION, VJTI

What is a Microcontroller?

- A microcontroller is a single Integrated Circuit (IC) that is typically used for a specific application and designed to implement certain tasks.

ESP 32:

ESP32 is a system on a chip that integrates the following features:

- Wi-Fi (2.4 GHz band)
- Bluetooth 4.2
- Dual high performance cores
- Temperature Sensor
- Hall Sensor
- Touch Sensor

GPIO : General Purpose Input Output pins

Normal Way of Connection

Printed Circuit Board (PCB) :

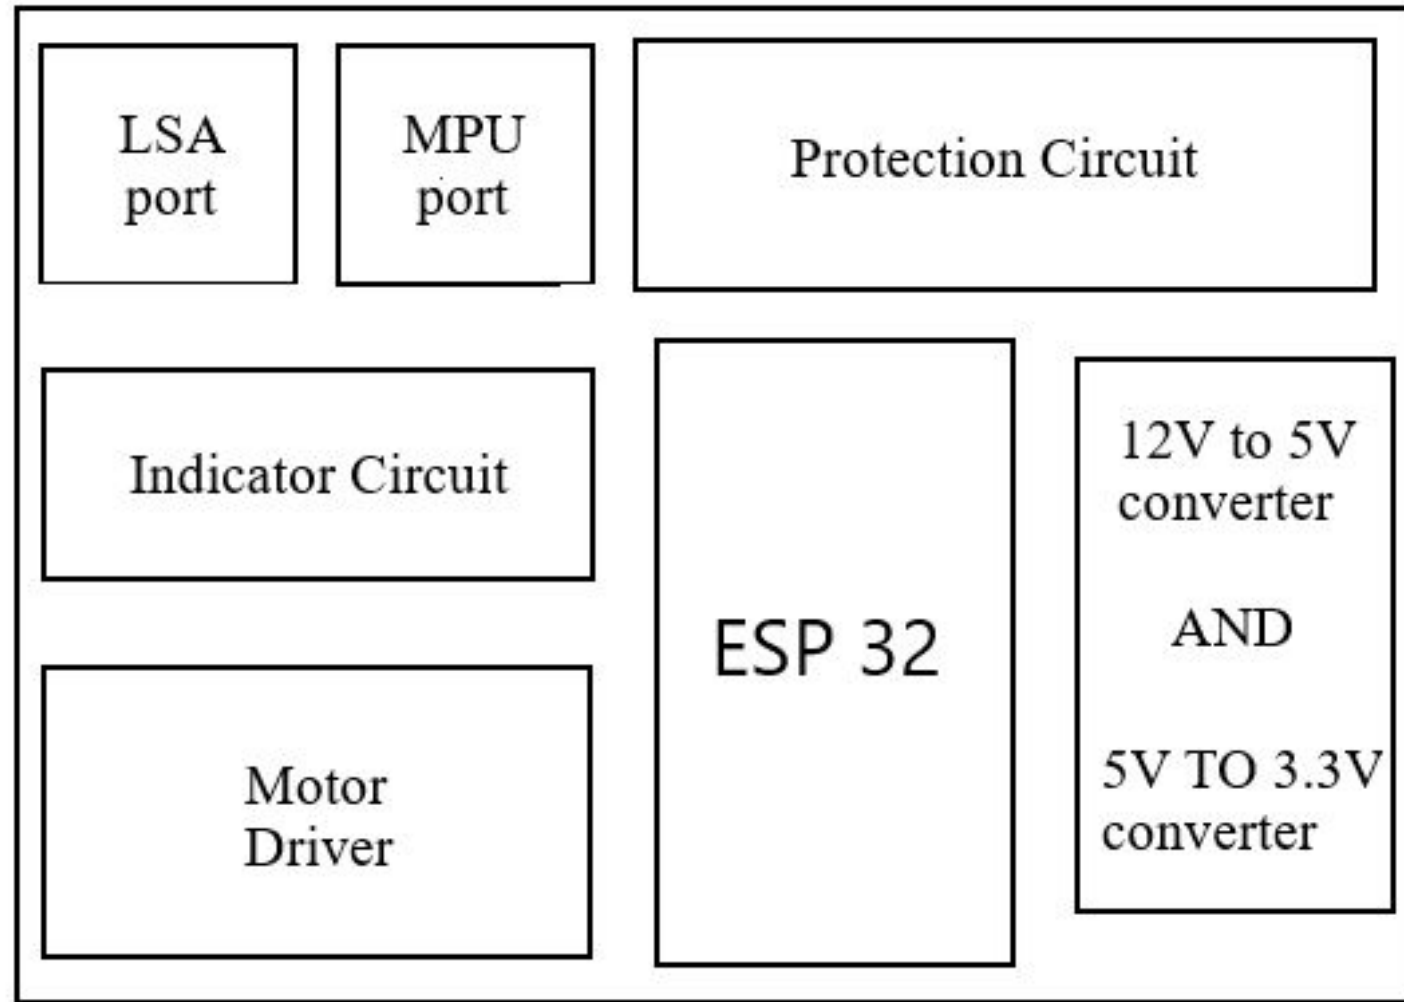

COPPER
TRACES

SRA BOARD:

Block Diagram:

SRA BOARD

ESP 32

Input
Voltage
(WHY 12V?)

Voltage
Regulators

Fuses:

300mA
For 5V

3A
For 12V

Working
Fuse

Blown
Fuse

Sensor port and Indicator Circuits

Switches and
Leds

MPU PORT

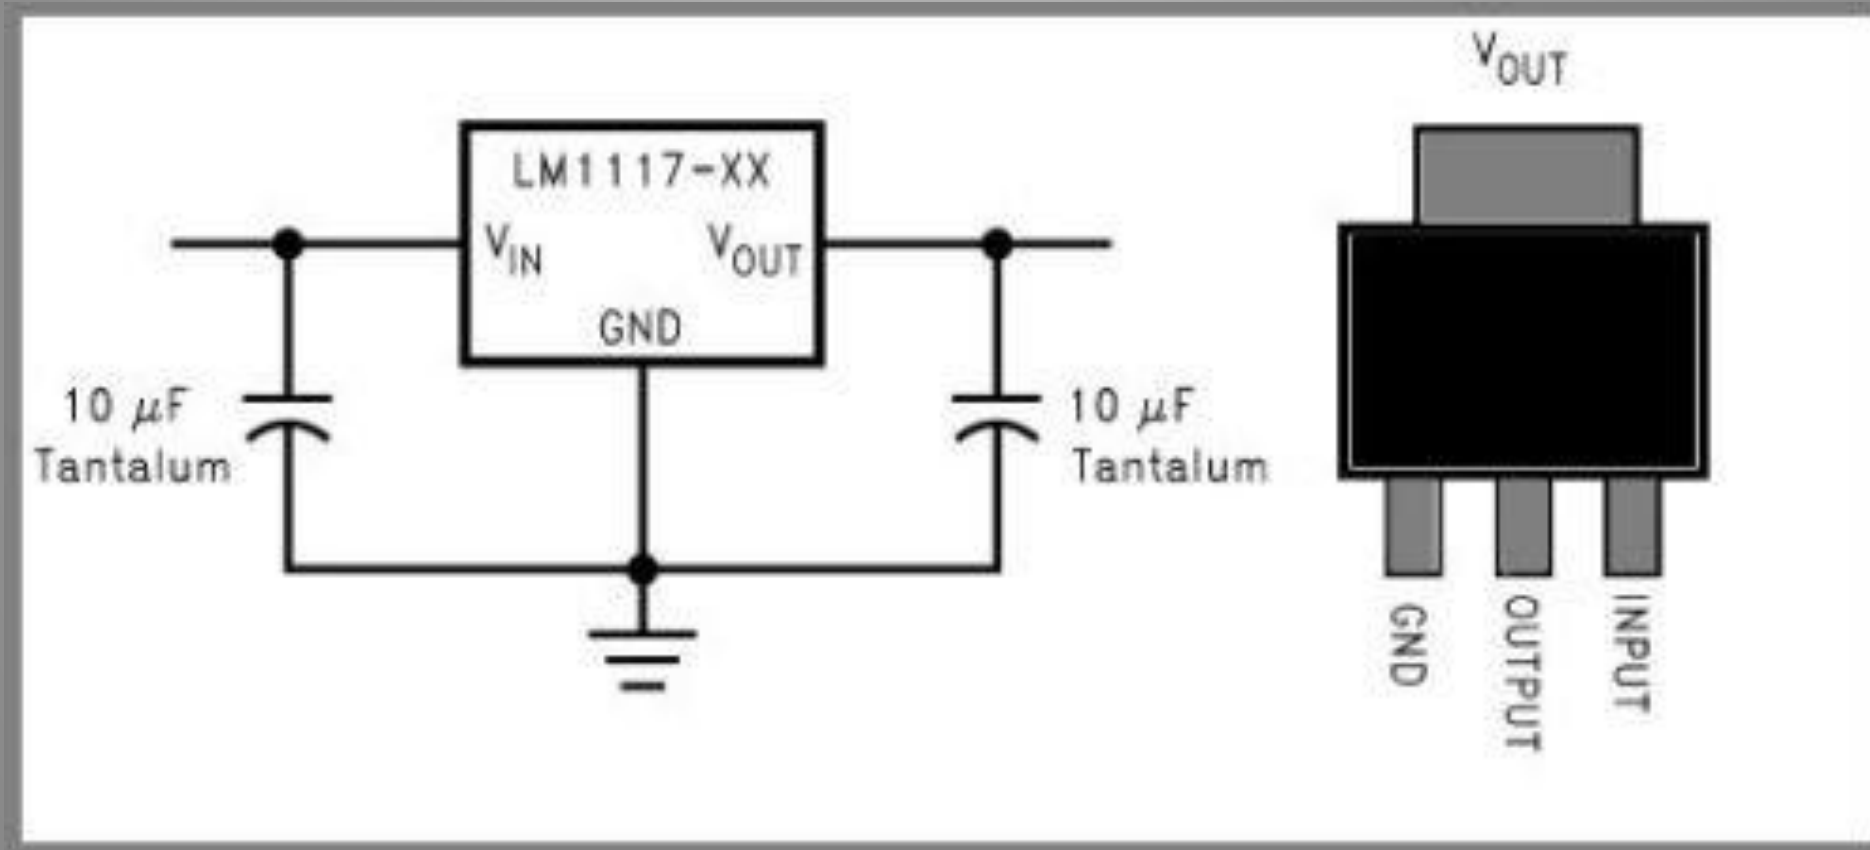

LSA PORT

7805 : Converts Input Voltage to 5V

LM1117 : Converts Input Voltage to 3.3V

Standard Voltages position on board.

Motor Driver

Heatsink
